PROFESSIONAL EXPERIENCE

Global Sales Manager, Business Automation | IBM Corporation | 2021 — Present

Montréal, QC • IBM Business Automation Software

- Drive global revenue growth across IBM's Business Automation portfolio, including AI-driven workflow, content services, decisioning, and RPA, managing a \$120M pipeline with 3% YoY growth and 105% quota attainment.
- Architect go-to-market motions blending direct sell-to, sell-with, and sell-through models with strategic partners, expanding partner-sourced revenue by 5% across 5 territories.
- Deliver C-suite executive briefings and keynotes positioning IBM automation against competitive alternatives including UiPath, Automation Anywhere, and Microsoft, securing executive sponsorship in 3 enterprise accounts.
- Implement forecasting models, coverage optimization, and deal-governance practices that improved forecast accuracy by 20% and shortened average deal cycle by 30 days.
- Lead seller enablement and territory planning across direct, technical, and partner teams, reducing new-hire ramp time and increasing per-rep productivity by 25%.
- Refine value propositions to demonstrate quantified ROI, risk reduction, and productivity gains, driving a 7–12% increase in average deal size.

Technical Pre-Sales Specialist — ECM & Business Automation | IBM Corporation | 2015 — 2021

Montréal, QC • Canada-wide technical sales coverage

- Owned technical sales strategy for Business Automation and ECM across Canada, partnering with sales leaders, channel partners, and enterprise customers to close \$17M in TCV across 11 deals.
- Architected tailored solutions through discovery, Proof of Technology, and Proof of Concept engagements addressing competitive-displacement scenarios, achieving an 85% PoC-to-close conversion rate.

Jean-Jacques Boileau • Enterprise Software Leadership • Montréal, QC

- Delivered bilingual English / French technical presentations to business, IT, and executive stakeholders across financial services, government, and Crown corporation accounts.
- Identified and developed new opportunities within the installed base, contributing \$4M of partner-driven and direct expansion revenue annually.
- Enabled customer deployments and early-adoption phases, driving cross-sell and modernization opportunities that expanded existing accounts post-implementation.

Client Technical Image Owner & Project Leader | Novartis Pharma Canada | 1998 — 2015

Montréal, QC • National client-environment authority

- Owned Windows client image standards and technical-policy authority for 700–1,100+ employees nationwide across multiple platform generations from Windows XP to Windows 7 and Windows 8.
- Led national hardware refresh, OS migration, and software deployment projects across Canada, managing cross-functional teams of 2–10 and project budgets of \$30K–\$1M across two regional offices supporting employees nationwide.
- Presented technology roadmaps and national standards to the Country Infrastructure Manager, President, and executive leadership, securing approval and funding for multi-year client-environment strategy.
- Resolved complex deployment escalations and enforced nationwide implementation consistency, reducing support-ticket volume and deployment defects by 50%.
- Built bilingual English / French training programs and documentation that onboarded 500+ field sales representatives onto new technologies with 100% adoption.
- Pioneered enterprise early adoption of Windows 7/8, SkyDrive, Lync, and iOS solutions, evaluating, piloting, and operationalizing technologies that became national deployment standards.

Corporate Systems Support & QC Supervisor | IBM Canada | 1996 — 1998

Montréal, QC • IBM Authorized Service Centers — Canada

- Established the Quality Control Supervisor role for IBM Authorized Service Centers across Canada from scratch, defining compliance protocols and monthly performance-reporting standards.
- Enforced IBM repair and service protocols across the national service-center network, producing monthly performance reports and improvement recommendations adopted at HQ.
- Researched corporate systems to identify defects and contributed fixes that improved repair quality and turnaround across Authorized Service Centers.
- Built lab environment and delivered live phone support and troubleshooting for corporate hardware customers; authored technical documentation and trained new team members on IBM service standards.
